User Stories

- As a user, I want to be able to select my favorite crypto and have the app periodically alert me of price movements
- As a user, I want to pause/resume certain symbols for notifications
- As a user, I want the notifications to be customized so I can type the message and use variables related to the activity
- As a user, I want to change the frequency of notifications and price checks, so it can be per hour, or a custom time interval
- As a user, it would make sense to delete portfolio items when not needed anymore
- As a user, I need a basic menu where I can quickly access the preferences screen, and any licensing/credits page as needed
